

From Archive to Alive

Nov 2021 - Nov 2023

Why the From Archive to Alive project?

Due to the fight against the COVID-19 pandemic, students have been deprived of cultural stimuli as field trips have been suspended and classes have been delivered at a distance. However, there are many online platforms such as EUscreen that provide exceptional material for everyone.

In addition, the need for civic participation, democratic values and social inclusion has become increasingly important

What are the objectives of the project?

The project aims to motivate students to explore available audiovisual archives, compare traditional and digital art, increase civic engagement and inclusiveness while raising awareness of environmental issues

*"Study the past if you would define the future."
Confucius*

How will the project achieve its objectives?

To achieve the project objectives, two intellectual outputs will be developed:

- An e-learning course, Art Vision, will be developed for teachers on how to use digital audiovisual archives.
- An online platform will be developed to host a digital art creation contest for students.
